# INTRODUCING THE BIG CULTIVATED BLUE BERRIES

A Gift to South-Eastern Massachusetts, these sensational Shrubs fill a many fold purpose. A dwarf slow growing bush, covered with small Bell-shaped white flowers in June, and in July and August loaded with the large Blue Berries in just three years after planting and improving every year thereafter. In late September and during all of October the Foliage is the richest Fall coloring, surpassing anyone's imagination. Along our Shores and Cape Cod are just **Ideal Locations** to plant. Not too wet, not too dry, Full Sun or even a partial Shade. Easy to plant and Easy to Care for.

## Introductory Offer
